

Autodesk Revit MEP 2010 / 2011 / 2012 Essential Training

This course is designed to teach users the essential features and functionality of Autodesk Revit MEP 2010 / 2011 / 2012, from building design through construction documentation. Practical exercises are used to help users understand the Building Information Modeling (BIM) concept and benefits of bidirectional associativity inside Revit.

Course Outline

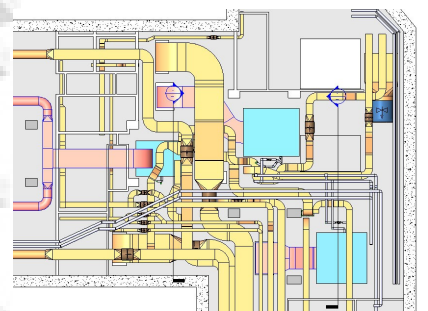

Day 1 - Working with MEP Basic

Building Information Modeling (BIM) Overview
User Interface & Navigation
Starting a Project/Working with Grids & Levels
Navigation, Design and Option Bar
View and Visibility Control
Project and System Browser
Introduction to Family

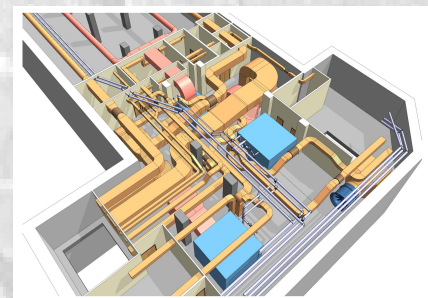

Day 2 – Working with MEP Family

Mechanical System
Duct and Air Terminal
Heat and cooling load calculation
Create system component and equipment
Layout path
Sizing and color scheme
Electrical System
Electrical and lighting fixture
Wire and switch
Panel board and schedule
Plumbing System
Pipe and equipment
Fire Protection System
Sprinkler

Day 3 - Working in Teams

Drafting technique
Tag, text, keynote, fill pattern and sheet
Understanding Families/Libraries

Duration	: 3 days, total of 18 hours
Time	: 9:30 am – 12:30 pm & 2:00 pm – 5:00 pm
Date	: Tailor-made schedule
Fee	: HK \$4,000 per participant
Venue	: Summit Technology (Hong Kong) Limited – Autodesk Authorized Training Centre Room 1903, Aitken Vanson Centre, 61 Hoi Yuen Road, Kwun Tong, Hong Kong
Certification	: A Certificate of Completion will be issued by Autodesk to all eligible students who successfully complete a course
